

Home compostable labels

Our home compostable labels are printed on NATUREFLEX™ film which is made from wood pulp.

Home compostable labels

- Manufactured from renewable wood pulp sourced from managed plantations employing Forestry Management principles
- Proven to be biodegradable in industrial and home compost environments
- Good gloss and transparency for excellent product presentation
- Static-free for high machine performance
- Resistant to greases, oils, and fats
- Naturally high gas barrier
- Can be associated with other home compostable packaging materials (e.g. Act as a label on bio-plastic trays, films, and bottles)
- In-house material coating unit offers various adhesives and liner combinations
- Available in clear or white
- Printable up to 8 colours with varnish or laminate finishes
